@bitcoin.daily

STEP 01

Start With The Goal

Break down the math before you trade a single candle.

Most traders never hit their income goals because they skip the arithmetic. \$10,000/month sounds like a dream. When you break it down, it becomes a target.

\$10,000 / month	=	\$333 / day
------------------	---	-------------

Trading success is not about finding the perfect signal. It starts with **simple math, not guessing**. Once you know the number, you reverse-engineer everything else.

The formula: Capital x Monthly ROI = Monthly Income

Everything in this guide works backwards from that equation. Know your numbers.

STEP 02

The 3 Numbers That Decide Your Income

Every trader's P&L; comes from exactly these.

Strip away every indicator and every narrative. Your monthly income is determined by three variables only:

#	Variable	What It Means
1	Win Rate	How often your trades close in profit
2	Risk-to-Reward (R:R)	How big your wins are vs. your losses
3	Trades Per Month	How often you execute

Combine them and you get your **Expected Value (EV)** -- the average profit per trade. This number tells you exactly how much you will make per month at any capital level.

Key insight: You don't need to be right all the time. You need a positive EV and the discipline to let it compound.

STEP 03

What Is Expected Value (EV)?

The only number that separates professionals from gamblers.

EV is your average outcome per trade. Positive EV means your strategy makes money long-term regardless of any individual losing streak.

EV Formula	Example (65% WR, 1:1 R:R)
$EV = (\text{Win Rate} \times \text{Avg Win}) \text{ minus } (\text{Loss Rate} \times \text{Avg Loss})$	$(0.65 \times \$100) \text{ minus } (0.35 \times \$100) = +\$30 \text{ per trade}$

At +\$30 EV and 1% risk per trade on a \$100K account (\$1,000/trade):

Trades / Month	EV Per Trade	Monthly Account Growth
20 trades	+0.30R	+6%
30 trades	+0.30R	+9%
40 trades	+0.30R	+12%

You don't need to trade every hour. You need **consistent EV** and enough trades to let it compound.

STEP 04

How Much Capital Do You Need?

Reverse-engineer the \$10k goal.

Given your monthly ROI, how much capital do you need under management?

Monthly ROI	Capital Needed	Monthly Income
6%	\$167,000	\$10,020
8%	\$125,000	\$10,000
10%	\$100,000	\$10,000
12%	\$83,000	\$9,960

Win Rate Impact (1:1 R:R, 1% risk per trade):

Win Rate	Trades/Mo	Monthly %	Capital Needed
60%	30	+6%	\$167K
60%	40	+8%	\$125K
65%	30	+9%	\$111K
65%	40	+12%	\$83K
70%	30	+12%	\$83K
70%	40	+16%	\$63K

Your income is 100% predictable once you know these three numbers. Win rate matters. Trade frequency matters. EV matters most.

STEP 05

"But I don't have \$80K-\$120K..."

Good news. You don't need it.

This is where prop firms change everything. A prop firm gives you a funded account to trade their capital. Pass an evaluation, prove your edge, keep the majority of profits without ever risking your own savings.

HyroTrader Account Sizes and Fees:

Account Size	2-Step Fee	1-Step Fee	Fee Refundable?
\$5,000	\$89	\$119	Yes -- 1st payout
\$10,000	\$159	\$199	Yes -- 1st payout
\$25,000	\$299	\$399	Yes -- 1st payout
\$50,000	\$499	\$699	Yes -- 1st payout
\$100,000	\$799	\$999	Yes -- 1st payout
\$200,000	\$999	\$1,399	Yes -- 1st payout

One-time fees. No recurring charges. Pass the evaluation, earn your first payout, and HyroTrader refunds the entire challenge fee. If you pass, the evaluation costs you nothing.

Use code **btcdaily** for **10% off** any HyroTrader challenge

STEP 06

Why 90% of Traders Fail Prop Firm Challenges

Not because the rules are hard. Because their habits are.

Only 5-10% of traders pass their first evaluation. The reasons are always the same:

Failure Reason	What It Looks Like
No risk plan	Sizing positions based on gut, not math
Emotional trading	Revenge trades after losses, breaking the rules
Overtrading	Taking low-quality setups just to feel active
No stop-loss	HyroTrader requires SL within 5 min of entry
Ignoring drawdown	5% daily / 10% total -- violating either = fail
No proven system	Changing strategy mid-challenge based on results

Prop firms aren't hard. **Undisciplined trading is hard.** The evaluation is just a mirror that reveals whether your habits are professional-grade.

HyroTrader key rules: Daily drawdown 5% | Max drawdown 10% | Stop-loss required within 5 min | Min 10 trading days | Max single trade risk 3%

STEP 07

Why HyroTrader Is Built for Crypto Traders

Real exchange execution. No synthetic feeds. No fake wicks.

Most prop firms run crypto on CFD platforms with simulated price feeds. HyroTrader executes on **real Bybit order books** via API -- the same prices and liquidity you would get trading your own Bybit account.

Feature	HyroTrader Details
Platforms	Bybit (API) + Cleo (Binance data feed)
Crypto Pairs	500+ USDT futures pairs on Bybit
Leverage	Up to 100x on major crypto pairs
Market Hours	24/7 -- weekends and overnight included
Payout Speed	12-24 hours in USDT or USDC
Payout Minimum	\$100 profit threshold to request
Challenge Fee	One-time, 100% refunded on first funded payout
Max Capital	Scale from \$200K to \$1,000,000 in 12 months
Free Trial	10-day free trial up to \$100K virtual capital

CLEO (Binance data) is the platform for traders in Bybit-restricted regions including the US. Same evaluation rules, same structure.

STEP 08

The Profit Split Scaling Path

Your split grows as you prove consistency.

HyroTrader starts funded traders at a 70% profit split. Every four months of profitable funded trading, your split increases by 5% until it caps at 90%. Your capital scales in parallel.

Timeline	Profit Split	Max Capital	At 10% ROI on \$200K
Month 0-4	70%	\$200K	You keep \$14,000/mo
Month 4-8	75%	\$260K	You keep \$19,500/mo
Month 8-12	80%	\$338K	You keep \$27,000/mo
Month 12+	85-90%	Up to \$1M	You keep \$85K-\$90K/mo

70% Starting Profit Split	90% Max Profit Split	\$1M Scaling Ceiling
-------------------------------------	--------------------------------	--------------------------------

Scale requirement: 20% net profit over any 4-month funded period (5% per month average) and minimum 2 payouts completed.

STEP 09

1-Step vs. 2-Step: Which Path to Choose?

Different routes. Same destination.

HyroTrader offers two evaluation paths. The 2-step challenge is the better risk-adjusted route for most traders because of the higher drawdown allowance.

	1-Step Challenge	2-Step Challenge
Profit Target	10% total	10% Phase 1 + 5% Phase 2
Max Drawdown	6%	10%
Daily Drawdown	5%	5%
Min Trading Days	10 days	10 days
Time Limit	Unlimited	Unlimited
Phases to Pass	1	2
Fee (\$100K account)	\$999	\$799
Verdict	RECOMMENDED	Twice the risk of failing

Recommendation: Go with the 1-Step challenge. The 2-Step requires you to pass two phases, which means two separate chances to fail. One target. One phase. Get funded and move on.

STEP 10

Option 1 -- My Personal Morning Trades

See exactly what I trade, when I trade it, and why.

Inside my Discord, I post my personal trades every morning before the market moves. Entries, stops, targets, and the reasoning behind every position. You don't copy-trade blindly -- you see the actual decision-making process of a data-driven trader operating on a funded account.

What You Get in the Discord:	Why It Matters:
My morning trade setups posted pre-market	See real entries before the move happens
Entry price, stop-loss, and target levels	Full transparency -- no vague calls
Trade rationale explained in plain language	Learn the thinking, not just the signal
Live recaps after each trade closes	Track the outcome, study the execution
Bear market strategy and cycle positioning	Trades aligned with the macro data I publish
7-day free trial, then low monthly fee	Test it before committing to anything

This is not a signal service. It is a front-row seat to how a profitable crypto trader approaches the market every single morning.

Join the Discord -- 7-Day Free Trial

whop.com/checkout/plan_1n7kzrv4rsBbs?d2c=true

STEP 11

Option 2 -- 1-on-1 Mentorship

Learn the skill. Own the edge.

If you want full control over your own success, mentorship teaches you to build and execute a profitable system yourself. Not signals. Not copy trading. **The actual skill.**

What You Learn:

Chart reading and market structure

Entry and exit frameworks

Risk management and position sizing

Trading psychology and discipline

How to build a positive EV system

How to pass HyroTrader evaluations consistently

How to think like a profitable trader

Mentorship is for traders who are serious about the long game. You'll have the tools, the framework, and the discipline to pass any prop firm challenge and keep the funded account.

Interested in Mentorship?

STEP 12

The Formula That Changes Everything

When the variables are real, trading stops being random.

Once you have a real strategy, a real risk plan, a real EV edge, and real capital through HyroTrader, the outcome stops being random. It becomes math.

Capital	x	Monthly ROI	=	Monthly Income
\$100K (HyroTrader)	x	10% (65% WR, 30 trades)	=	\$10,000 You keep \$7,000+

Math is predictable. Trading is not random when you have a genuine edge. The only variable left is whether you execute with discipline.

10x More capital vs personal account	\$0 Personal savings at risk	\$1M Scaling ceiling with consistency
--	--	---

Not vibes. Not narratives. Math.

@bitcoin.daily

READY TO START?

Follow these three steps in order.

Get Your Funded Account -- HyroTrader

Start with the free 10-day trial. No payment required. When you're ready to challenge, use code **btcdaily** for 10% off any account size.

www.hydrotrader.com/?coupon=btcdaily

Join the Discord -- My Morning Trades, Live

Every morning I post my personal trade setups before the market moves. Entries, stops, targets, and the reasoning. 7-day free trial.
