6%-14%

1-step profit target

40-100%

Profit split range

\$300K

Max starting capital

0 (eval) / 5 (Instant Pro)

Min trading days

HYROTRADER

10%

1-step profit target

70-90%

Profit split range

\$200K

Max starting capital

10

Min trading days (eval)

@bitcoin.daily

What They Have in Common

The shared foundation -- before we get to the differences.

Both firms were built for the same trader: someone who trades crypto and wants access to serious capital without risking their own money. The list of things they share is longer than most people realise.

Feature	Both Firms
Asset class	Crypto only -- USDT perpetual futures
Exchange execution	Real Bybit order books -- no synthetic feeds, no fake wicks
Crypto pairs	700+ USDT pairs via Bybit
Leverage	Up to 1:100
Spreads	Zero spread -- Bybit maker/taker fees only
Challenge fee	One-time, refunded on first funded payout
Time limit on eval	None
Weekend holds	Allowed
News trading	Permitted
Personal capital at risk	Zero
Payout currency	Crypto (USDT/USDC)
Payout speed	12-24 hours
Martingale	Prohibited at both firms
Arbitrage / HFT	Prohibited at both firms
Hedging	Prohibited at both firms
Partnership	Both officially partnered with @bitcoin.daily

Challenge Structures

Every evaluation type at both firms.

Klein Funding -- Evaluation Plans

Plan	Phase s	Profit Target	Drawdown	Min Days	Split Range
1-Step	1	= drawdown (e.g. 6% DD = 6% target)	6%-14% (you choose)	0	40%-100%
2-Step	2	= DD + half DD (e.g. 6% + 3%)	6%-14% (you choose)	0	40%-100%
3-Step	3	= DD + half + half (e.g. 6% + 3% + 3%)	6%-14% (you choose)	0	40%-100%

Profit target always equals the drawdown you chose -- 1:1 ratio. Pick 6% drawdown and your target is 6%. Pick 10% drawdown and your target is 10%. Daily drawdown = 50% of total (resets 12:05 AM UTC). Stability score: 30% on 1-step, 45% on 2/3-step -- applies eval AND funded stage.

HyroTrader -- Evaluation Plans

Plan	Phase s	Profit Targets	Max DD	Daily DD	Min Days
1-Step	1	10%	6%	4%	10
2-Step	2	10% (P1) 5% (P2)	10%	5%	10 (P1) 5 (P2)

Daily drawdown on 1-step is 4% (stricter). 2-step gives more room: 5% daily and 10% max. For most traders, 2-step is the better risk-adjusted choice on HyroTrader. All fees refunded on first funded payout.

Account sizes available:

Account Size	Klein Funding	HyroTrader
\$5,000	--	Yes (from \$89)
\$6,000	Yes (from ~\$41)	--
\$10,000	--	Yes (from \$159)
\$13,000	Yes (from ~\$75)	--

\$25,000	--	Yes (from \$299)
\$30,000	Yes (from ~\$130)	--
\$50,000	Yes (from ~\$230)	Yes (from \$499)
\$100,000	Yes (from ~\$488)	Yes (from \$799)
\$200,000	--	Yes (from \$999)
\$300,000	Yes (from ~\$563)	--

Klein fees vary based on chosen drawdown % and profit split. HyroTrader fees shown as 2-step / 1-step.

Profit Splits, Payouts, and Scaling

How the money works at each firm.

Profit split comparison:

	KLEIN FUNDING	HYROTRADER
Starting split	40%-100% (you set at signup)	70% fixed (all plans)
Max split	100%	90%
How split changes	Fixed from signup based on plan config	+5% every 4 months of consistent performance
Split applies during	Funded stage only	Funded stage only

Payout comparison:

	KLEIN FUNDING	HYROTRADER
When you can request	Any time stability score is met	1 calendar day after first funded trade
Min profit to withdraw	Not specified -- stability score is trigger	\$100
Processing time	4-24 hours (often ~4 hours)	12-48 hours
Payment methods	Crypto wallet (USDT ERC20/TRC20) OR bank wire (EUR/USD)	USDT or USDC only (no fiat/bank wire)
Challenge fee refund	With first funded payout	With first funded payout
Payout frequency	On demand	On demand

Key difference on payouts: Klein offers fiat bank wire (EUR/USD) as well as crypto. HyroTrader is stablecoin only -- USDT or USDC. If you need to receive fiat directly, Klein is the better fit.

Scaling comparison:

	KLEIN FUNDING	HYROTRADER
Scaling mechanism	Hit 10% profit, forfeit 50% of it to double account	Hit 20% net profit + 2 payouts over 4 months
Cost to scale	50% of profits each time	Nothing forfeited
Split increase on scale	No -- split stays what you configured	Yes -- +5% per 4-month milestone
Max via standard eval	\$300K	\$1,000,000

Max via Instant Pro	\$2,000,000	N/A (no instant funding)
---------------------	--------------------	--------------------------

Instant Pro scales to \$2M -- highest ceiling at Klein. Standard eval accounts cap at \$300K via the forfeiture model. HyroTrader's path is slower but you keep every dollar earned and your split grows alongside the capital.

Klein Funding -- Instant Pro account:

Instant Pro is a completely different product from Klein's evaluation accounts. No challenge. No profit target to pass. Pay the fee and start trading the same day.

Feature	Instant Pro Details
Evaluation required	None -- instant funded access
Starting split	70%
Max split	90% (on-demand upgrades available)
Min trading days (payout)	3 days with at least 4% profit before first withdrawal
Min trading days (account)	5 minimum trading days
Drawdown type	Smart drawdown (locks at -3% once +3% profit hit) or Trailing drawdown (8% trailing)
Scaling	Same mechanism: hit 10% profit, forfeit 50%, account doubles
Scaling ceiling	\$2,000,000
Stability score	None -- no consistency requirement
Fee refundable	No -- Instant Pro fees are not refunded
Best for	Experienced traders who want to skip evaluation entirely

Note: Instant Pro fees are NOT refunded (unlike evaluation account fees). The trade-off is immediate access with no challenge, but you pay more upfront and keep less early on (70% start). HyroTrader has no equivalent instant funding option.

Rules Comparison

Every rule that matters at both firms.

Rule	KLEIN FUNDING	HYROTRADER
Profit target (1-step)	= max drawdown chosen (always 1:1 ratio)	10% (fixed)
Max drawdown	6%-14% (configurable)	6% (1-step) 10% (2-step)
Daily drawdown	50% of total (3%-7%) Reset: 12:05 AM UTC	4% (1-step) 5% (2-step) Reset: midnight UTC
Drawdown type	Static (balance-based)	Static (balance-based)
Min trading days	0 (eval) / 5 (Instant Pro)	10 (P1) / 5 (P2)
Stop-loss rule	Not required	Mandatory within 5 min of every entry
SL violation	No rule	1 soft breach allowed (1hr to fix). 2nd = instant fail
Max risk per trade	Not specified	3% of account balance
Max open exposure	Not specified	25% of account balance
Cumulative position limit	Not specified	Max 2x account balance
Consistency rule	Stability score: 30% (1-step) 45% (2/3-step) Applies eval + funded	Profit dist. rule: max 40% from one day (eval only, not funded)
Low-cap altcoin rule	None	Max 5% in coins under \$100M mcap
Automation / bots	Not allowed (EAs prohibited)	Allowed on Bybit API (not on Cleo)
Hedging	Prohibited	Prohibited
API deletion	Immediate account closure	Immediate account closure
Spot trading	Not allowed (USDT perps only)	Not allowed (futures only)
Daily reset time	12:05 AM UTC	Midnight UTC
Weekend trading	Allowed	Allowed
News trading	Allowed	Allowed
Martingale	Prohibited	Prohibited

Arbitrage / HFT	Prohibited	Prohibited
-----------------	------------	------------

Platform, Access, and Firm Details

Everything outside of the rules.

	KLEIN FUNDING	HYROTRADER
Trading platforms	Bybit only	Bybit (API) Cleo (Binance data) OKX (coming)
US traders	No official restriction but Bybit rules apply	Yes -- Cleo platform built for this
Country restrictions	None (firm-level)	None (firm-level)
Free trial	None	10-day free trial up to \$100K virtual
Algo trading	EAs prohibited	Allowed on Bybit API (not on Cleo)
Dashboard	Bybit + Klein dashboard built-in journal, real-time P&L;	HyroTrader dashboard tracks drawdown + stats
UI/UX	Functional, improving (newer platform)	Cleaner, more polished
Customer support	24/7, highly praised CEO-level responsiveness	Strong, primarily EU business hours
Community	Active Discord 11,000+ traders	Discord + trader network active community
Multiple accounts	Max 1 eval at a time \$300K max funded total	Multiple allowed \$200K max across all
Founded	Nov 2024 (UK)	2023 (Slovakia)
Total paid out	\$320,000+	\$3.5M+
Trustpilot	4.9/5 (~200+ reviews)	4.4/5 (~162 reviews)
Challenge fee payment	Credit card, crypto PayPal	Credit card, 12+ cryptos incl. DOGE, SHIB

Prohibited Strategies -- Full List

What will get your account closed at each firm.

Klein Funding -- Prohibited:

Prohibited Action	Notes
Arbitrage	Any form of price arbitrage between platforms
Latency trading	Exploiting price feed delays
HFT / tick scalping <50sec	High-frequency or scalping under 50-second hold time
EAs / trading bots	Expert Advisors and automated trading scripts prohibited
Hedging	Hedging by account or group trade -- all forms prohibited
Account sharing	Multiple users on one account
Demo exploits	Any exploitation of the demo environment
Spot / USDC / options trading	Must trade USDT perpetuals on Bybit only
Delete or modify API key	Immediate account closure
Stability score violation	Not a breach -- but delays withdrawal until resolved by trading more

HyroTrader -- Prohibited:

Prohibited Action	Notes
No stop-loss	Mandatory within 5 min. 1 soft breach allowed. 2nd = instant account fail
Cancel stop-loss	Edit it instead. Cancelling without closing position = breach
Martingale strategy	Strictly prohibited
Hedging	All forms prohibited -- opposing positions across accounts or platforms
Delete / modify API key	Immediate account closure
Request demo funds	Requesting additional virtual funds from Bybit

Spot trading	Must trade futures only
USDC pairs / options	Only USDT perpetual futures allowed
Low-cap altcoins >5%	Max 5% of account in coins under \$100M mcap or \$5M daily volume
Profit dist. violation	Eval only -- one day >40% of total profit blocks payout until resolved

Which Trader Are You?

Pick based on what actually matters to you.

I want to configure my own profit split from day one Klein lets you set 40-100% split at signup. HyroTrader locks you at 70% to start.	KLEIN
I want a lower profit target to pass the evaluation Klein's profit target equals your chosen drawdown -- pick 6% drawdown and your target is 6%. HyroTrader is always 10%, fixed.	KLEIN
I want zero minimum trading days Klein's eval plans have no minimum trading days. HyroTrader requires 10 (P1) and 5 (P2).	KLEIN
I want the cheapest challenge fees Klein starts around \$41 for a \$6K account. HyroTrader starts at \$89 for \$5K. Cheaper across all tiers.	KLEIN
I want to receive payouts via bank wire in fiat Klein pays via bank wire (EUR/USD) or crypto. HyroTrader is USDT/USDC stablecoin only -- no fiat wire.	KLEIN
I want to use trading bots or algorithms Klein prohibits EAs. HyroTrader allows bots/algos on the Bybit API (not during eval on Cleo).	HYROTRADER
I want looser evaluation rules overall Klein has no mandatory SL, no per-trade risk limits, no exposure caps, and no low-cap restrictions. HyroTrader enforces all of these strictly.	KLEIN
I want to receive payout and scale without forfeiting profit HyroTrader scales to \$1M and raises your split -- you forfeit nothing. Klein requires you give up 50% of profit to double your account.	HYROTRADER
I am based in the US HyroTrader built Cleo (Binance data) specifically for US traders. Klein has no restriction but uses Bybit directly.	HYROTRADER
I want to test the platform before paying anything	HYROTRADER

HyroTrader offers a free 10-day trial up to \$100K. Klein has no free trial.	
I want to run bots or algorithms on my funded account HyroTrader allows bots and algos on the Bybit API. Klein prohibits EAs and automated trading scripts entirely.	HYROTRADER
I want access to \$200K+ from a single funded account HyroTrader offers a \$200K starting account. Klein's largest evaluation account is \$100K (total allocation \$300K across accounts).	HYROTRADER
I want a more polished, cleaner platform experience HyroTrader's UI and dashboard are more built-out. Klein's platform is functional but newer and rougher.	HYROTRADER
I want to skip the evaluation and start trading today Klein's Instant Pro account requires no evaluation. Pay, get funded, trade the same day. HyroTrader has no equivalent.	KLEIN
I trade with a stop-loss on every position already HyroTrader's mandatory SL rule won't change anything for you. Both firms work equally well here.	EITHER

Ready to Get Started?

Both firms are legitimate. Both have been personally tested. Pick the one that fits your trading style.

Klein Funding

1-step, 2-step, 3-step evaluations + Instant Pro (no evaluation). Configurable splits 40-100%. Zero min trading days on eval plans. Lower fees. Bank wire payouts. Scales to \$300K (eval) or \$2M (Instant Pro).

kleinfunding.com

HyroTrader

1-step and 2-step. Free 10-day trial. US traders via Cleo. Scales to \$1M, split grows to 90%. No profit forfeited to scale. **Use code btcdaily for 10% off.**
